

OUR SERVICE
OFFERINGS

Need help transitioning from ArcMap to ArcGIS Pro?

ArcGIS Pro is the premier tool for GIS professionals. It offers modern map authoring, advanced analysis, data visualization, extensibility, and complete integration with the ArcGIS system by leveraging the named user licensing model. Its predecessor, ArcMap, entered the Mature Support phase of its product life cycle in March 2024, marking the end of software updates and patches. We have curated several resources here to help guide your migration journey.

MNC's ArcMap Migration Services help land administration organizations smoothly transition from ArcMap to ArcGIS Pro, ensuring continuity in property mapping, land records management, and geospatial workflows with minimal disruption. This process can be further enhanced by GeoAI capabilities, leveraging machine learning and deep learning for advanced spatial analysis and automation during and after migration.

Our Migration Services for Land Administration Include:

Our Technologies and Capabilities

CHALLENGES	OUR SOLUTIONS
Migration Complexity and Uncertainty of Requirements	<ul style="list-style-type: none"> • Assess workflows, data, custom tools, infrastructure, and user skills • Identify gaps and challenges • Ensure alignment with organizational objectives and initiatives • Develop a migration roadmap
Transition to ArcGIS Pro	<ul style="list-style-type: none"> • Recommend training plans to equip teams with the skills required to confidently use ArcGIS Pro • Engagement and communication with organizations and teams to facilitate adoption and address change management issues • Empower individuals and teams to be part of the solution
Compatibility, Cost, and Migration	<ul style="list-style-type: none"> • Navigate complex licensing migration • Infrastructure recommendations, setup, and configuration • Accurately migrate maps and data
Workflow Adaptation	<ul style="list-style-type: none"> • Migrate existing tools and scripts • Leverage new ArcGIS Pro functionality
System Integrations and Interoperability	<ul style="list-style-type: none"> • Ensure compatibility and integrations with existing upstream and downstream enterprise systems and applications
Support and Maintenance	<ul style="list-style-type: none"> • Technical support • Systems modernization • GIS Managed Services

Values & Outcomes:

- ✓ **Greater efficiency in land records management** thanks to faster processing and streamlined workflows, powered by GeoAI-driven automation.
- ✓ **Future-proof GIS operations** by adopting supported and regularly updated technology, ready for advanced GeoAI applications.
- ✓ **Access to automated and advanced workflow options** using modern scripting and geoprocessing tools, including sophisticated GeoAI frameworks.
- ✓ **Transform static data into dynamic maps and actionable insights**, integrating information from multiple sources through advanced GeoAI analytics.
- ✓ **Enhanced data visualization**, including advanced 3D mapping of complex land features.
- ✓ **Seamless sharing and publishing of your work** within your organization and to external stakeholders.

Take the leap to modernize your GIS operations with our expert guidance. MNC has the experience and expertise to facilitate a more efficient, effective, and less disruptive transition from ArcMap to ArcGIS Pro, helping organizations maximize the benefits of the new platform.

We've helped numerous organizations transition from ArcMap to ArcGIS Pro, and we'd love to do the same for your organization. Contact us today to discuss your specific needs and schedule a consultation.

ABOUT MNC
The Cadastral and
Parcel Mapping
Experts

MNC is a trusted leader in cadastral and parcel management with 25+ years of experience delivering GeoAI-ready datasets, modernizing parcel fabrics, and automating GIS workflows. As an Esri Gold and Cornerstone Partner with a Parcel Management Specialty and State and Local Government Specialty, MNC provides scalable advanced GIS, ArcGIS Pro, FME automation, MicroStation, AutoCAD and cloud-ready geospatial systems that improve data quality and support government land administration modernization across Canada, the USA, and the Caribbean.
