

The Cadastral and Parcel Mapping Experts

2001: Alberta Geo-Administrative Mapping

Overview

MNC maintains the Geo-administrative Boundaries for Alberta Municipalities, Towns, Cities, Villages, Urban Service Areas, Summer Villages, and Indian Reserves in alignment with the Cadastral and Titles fabrics.

Challenge

The current administrative boundaries did not align with the Cadastral Provincial Mapping which makes it difficult for users to rely on the information for decision making.

Solution

MNC went through a process to align all the Municipal boundaries that fall under the Mapping Data Agreement to align with the Cadastral Provincial Mapping and continues to maintain these alignments using the following software, Bentley (MicroStation), Esri (ArcGIS) and Safe Software (FME).

Result

Aligning municipal boundaries with the cadastral fabric contributes to better governance, improved land management, and enhanced decision-making processes for local Governments.

About MNC

MNC is the expert in the compilation and maintenance of cadastral and parcel mapping. Providing clients with practical and innovative data collection, mapping and geomatics solutions related to surveyed land information.
