

The Cadastral and Parcel Mapping Experts

## 2019: TPR Parcel Workshop and Discovery Report

### Overview

The Property Registry (TPR) was looking to enhance their current survey plan and title, examination and approval services. They would like to take advantage of proven technologies and processes to be more efficient and offer better customer service.

In April 2019, an information gathering workshop was held to review and discuss existing solutions and internal business requirements with subject matter experts from MNC. In May 2019, the results of this workshop were summarized by MNC and presented in a Discovery Report with an outline of potential process improvements, obstacles, and a recommended approach forward.

### Result

The report identified that a Parcel Management Program for TPR could provide numerous improvements to support:

- Reduced approval and registration times,
- Improved speed and efficiency of land-related research, planning and business decisions,
- More accurate record keeping, and
- A reliable single spatial view of a comprehensive representation of land parcels in Manitoba.
